

SPORTJET

Discover the joy.

SPORTJET

We make the world's leading jet tenders so you can make the memories.

Since we launched our first boat in 1996, we have been changing the game and challenging the boundaries of boat building. Today, we are recognised as the pioneers of luxury, high-performance jet tenders... and we're just getting started.

Compelled by a desire to explore, we remain dedicated to evolving our craft through cutting-edge technologies, materials and processes that are fit for the future.

Built with passion, unrivalled expertise and exceptional craftsmanship, our boats are made to give you memorable moments on the water.

Discover the joy.

We are evolving our
craft for a better future
and we want you to
share the journey.

Full-throttle thrill.

SPORTJET

The SportJet will do all you've come to expect from a Williams jet tender. It will carry your passengers in style and comfort, and cruise serenely across the water as you head to golden beaches or back to your yacht.

But we put 'Sport' in its name for a reason... Powered by the blistering BRP Rotax engine series, the SportJet is the go-to craft for legendary wakeboarding and waterskiing sessions. Its sports hull delivers laser-accurate straight lines when your skier is in tow, and when turning, you can throw it into corners like it's on rails.

So yes, the SportJet works hard when you need it to. But open up that throttle and it soon becomes all about the play.

Made for each other.

The world's best yachts are built with Williams in mind, making our jet tenders a seamless extension of your onboard life, designed to fit and perform exactly how you need them to.

Our long-standing relationship with yacht builders means our tenders fit seamlessly with their garage systems, ensuring style, practicality and performance come as standard, but the experience of a Williams tender remains uniquely special.

The world's best
yachts are built with
Williams in mind.

Silky smooth to full throttle.

The sleek,
serene cruiser
built to deliver
blistering
speeds.

Lightweight yet powerful. Compact yet spacious. A smooth-sailing cruiser and a high-performance ski boat. If the SportJet sounds like a contradiction, that's because it is – which is testament to our engineers, who designed the SportJet to be the most versatile tender in the world.

With its cleverly crafted interior, there's always space for socialising. But when the mood takes you, the SportJet goes from pleasure craft to powerboat in the blink of an eye – perfect for wakeboarders, waterskiers and thrill-seekers.

It's also quiet, clean and – with no exposed moving propeller – completely safe in the water.

Space, power and performance come as standard.

The feeling should be uniquely you.

Handcrafted and bespoke.

Select custom colours, fixtures and finishes to ensure your tender looks and feels like yours.

SPORTJET

345

We've designed the SportJet 345 to fit on 16m+ yachts, so owners of smaller yachts can now experience the ultimate high-performance sports tender.

And even though we made it to be compact, it's still big enough to comfortably seat five adults and carry them away on far-flung cruises with its ample 50-litre fuel tank.

They're guaranteed to enjoy the ride too, with the 345's BRP Rotax engine and expertly designed sports hull providing power and precision in one small but mighty package.

SPECIFICATION

LOA

3.45m / 11ft 3in

BEAM

1.77m / 5ft 8in

SPORTJET
395

The SportJet 395's low seating configuration means its six passengers revel in every twist, turn, and burst of acceleration.

At the same time, its increased tube diameter improves stability, keeping you drier in choppy waters and giving you the freedom to go further and explore more.

With the 395, endless memorable days of fun, relaxation and sporting action stretch out before you – whatever the conditions.

SPORTJET
435

The SportJet 435’s blistering acceleration and top speed of up to 84kph (52mph) is matched by its incredible stability and pinpoint handling.

And thanks to its sociable seating layout, up to seven passengers can enjoy the ride as you power along crystal clear coastlines or rip around the bay with wakeboarder in tow.

Not forgetting, of course, that the SportJet 435 is ideal for yacht tender duties and will fit comfortably on the back of 20m+ motor yachts.

Upgraded Engine – 130hp

SPORTJET

460

With its specially designed hull planting it in the water, the 460 is a super-comfortable cruiser, perfect for safe, straight-line tracking and cruising along the coastline.

But with a top speed of 77kph (48mph) and the responsiveness to grip hard in the turns, it's also a white-knuckle ski boat that can give up to six passengers the thrill of their lives.

The development of iDF (intelligent Debris Free) provides the helmsman the opportunity to safely and remotely clear debris from the jet inlet, and is included as a standard feature on both 460 and 520 models.

SPECIFICATION

SPORTJET

520

Our largest model in the SportJet range, the 520 has a sunbathing pad, ample storage, and plenty of room for seven adults.

But don't let its size fool you. With a 230hp Rotax engine and a top speed of 90kph (56mph), the 520's practicality doesn't come at the cost of its punch.

As with every SportJet, towing friends is not only easy, it's safe, too – the iconic Williams jet propulsion system means no blades are exposed in the water, and the development of iDF (intelligent Debris Free) provides the helmsman the opportunity to safely and remotely clear debris from the jet inlet as standard.

From practical tender duties to adrenaline-fuelled days in the sun, the SportJet 520 is master of them all.
